CREATIVE FLOORING

Cleaning your European Oak Timber Floor

Floor Service Parquet Cleaner cleans all lacquered and hard waxed oiled timber flooring

Instructions for use: Add Floor Service Parquet Cleaner to warm water (100ml to 200ml to 10 litres). Clean with a mop or damp cloth, being mindful not over-wet the floor. Then using a dry cloth to buff off any excess water. A good option is to use a Microfibre spray mop, giving you the ability to control how wet you get the surface. And been able to clean that area straight away with the microfibre cloth.

Microfibre Spray Mop: Fill the spray mop reservoir with approximately 500ml of warm water. Add just under a capful of floor cleaner to the water. Do not add more concentrate, as excess will not improve cleaning performance. Spray a light mist of the cleaning solution onto the floor surface. Gently work the spray mop across the floor to distribute the cleaner evenly. Pay special attention to areas that may require extra cleaning, applying a slightly more thorough approach if needed. When finishing, ensure your final strokes follow the long direction of the floorboards for a consistent and thorough clean.

Spot cleaning: Mix two capful of floor cleaner to 500 mls of water in a spray bottle. To keep as a on hand spot cleaner.

Damp Stain: Clean the spillage up with a paper towel then then spray area and allow to sit for up to 5 minutes. Massage the area with a microfibre cloth then dry with a paper towel. Allow area to fully dry and repeat process if needed.

Dry Stain: Spray area and allowed to sit for up to 5 minutes. If stain doesn't remove easily with a microfibre cloth, use a light bristle scrubbing brush. Spraying to remove the access and dry with a paper towel.
