*'Style is a way to say who you are without speaking.'*

***Genuine Oak is a high-quality grade French Oak engineered floor, an innovative design which reflects unmatched durability and stability.***

With a precision Tongue & Groove locking system (ends & sides) Genuine Oak is cleverly constructed with a plantation eucalyptus plywood core, a reinforced veneer backing and a French Oak lamella. Timber is a natural product hence highly susceptible to changing when there is a variance in temperature and humidity, the layered construction of Genuine Oak increases stability as it is less prone to contracting and expansion in changing climates. Not only that, it has a lower environmental impact as only the top layer is hardwood, using less vital resource.

Finished with a 7 coat Treffert Lacquer System, the range offers endless stain options from lights to darks, you are sure to find something to suit your home or commercial space. Alternatively purchase as RAW\*, designed to be stained and finished on site, where you can carefully curate to your chosen theme. Genuine Oak is available in 3 different specifications including a traditional width or a wider board option where even the smallest of rooms will appear larger and offer less visible joints improving the overall aesthetic. For a timeless connection in the modern day, Genuine Oak also has a range of tones available in Parquetry, adding that little bit of extra luxury with the benefits of an engineered floor.

<b>Genuine Oak Specifications</b>	<b>240/15</b>	<b>190/15</b>	<b>190/12</b>
