Cork is a perfect floor without disrupting your life. In one day, your floor can be laid and finished with high quality tiles from the Mediterranean forests in Portugal. With Coloured Cork you can create soft and warm flooring as varied as your imagination will allow.

Each tile is crafted especially for you. Custom colours are available to match any colour of the Resene paint chart or you can choose from the popular range. Cork is of high density 6mm cork tiles. These are finished with waterborne polyurethane which has low VOCs with an 'R Factor' of 2.6.

Cork comes in three sizes:

300 x 300 x 6mm

600 x 300 x 6mm

900 x 150 x 6mm

Coloured cork tiles come with a small 1mm bevelled edge, while Natural (traditional) cork can be laid seamless. No sanding is required until the final coat of waterborne polyurethane is to be applied. The final coat comes with a semi matt finish.

Acoustic Cork Sheets are an excellent product for underlay and insulation. These come in 915 x 610mm x 6mm sheets.

Cork is excellent in bathrooms, kitchens, family rooms, bedrooms, toilets, laundries, dining rooms, reception areas, halls, churches, classrooms and theatres.
